labs

ABOUT THE PROGRAM

What is the Leapfrog Enterprise AI Adoption Program?

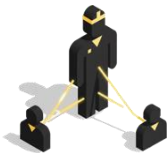

Leapfrog is not a training program. It is a structured AI learning plan that combines leadership advisory, strategic road mapping, and enterprise-wide capability building into one integrated engagement.

Designed for organizations that want AI to become a core operating advantage — not a side project.

IN A NUTSHELL

Three tracks. Flexible modalities. One outcome:

Your organization moves from AI curious to AI competitive — **with measurable results.**

01

Leadership Counselling

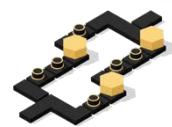

Align the C-Suite on AI vision and drive org-wide change

02

Enterprise-Wide Upskilling

Build AI fluency across every function and level

03

Roadmap Advisory

Translate AI ambition into a phased, measurable action plan

Each track operates independently but compounds when combined. Enterprises can start with any single track and expand.

TARGET AUDIENCE

Who is Leapfrog Built For?

Leapfrog is built for enterprises at varying stages of AI maturity. Whether you are exploring AI for the first time or scaling existing pilots, the package adapts to where you are.

Conglomerates & Large Enterprises

Leadership teams managing complex, multi-BU organizations that need a coherent AI strategy across verticals. Leapfrog brings structure to org-wide AI adoption.

Family-Led Businesses

Next-gen and current leadership looking to modernize operations and decision-making with AI. Leapfrog builds both conviction and capability.

PE / VC-Backed Companies

Growth-stage companies that need AI-fluent teams to maintain velocity without ballooning headcount. Leapfrog accelerates capability without bulk hiring.

Mid-Market (500–5,000 employees)

Organizations large enough to benefit from AI at scale but without internal capability to drive adoption alone. Leapfrog provides the structure and expertise.

Global Enterprises in India / Asia

MNCs that need localized AI enablement across distributed teams and diverse markets. Leapfrog is built for the Asia context.

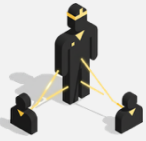

For Enterprise Decision-Makers ready to make AI a core operating advantage.

PROGRAM STRUCTURE

The Three Tracks

Each track operates independently but compounds when combined. Enterprises can start with any single track and expand.

Leadership Counselling

TRACK 01

Boards, CXOs, and Senior Leadership Teams

Small-group workshops · 1:1 CXO coaching · Board briefings

- Structured advisory sessions to build conviction at the top.
- Align leadership on an AI-first vision and shared vocabulary
- Address fears, resistance, and knowledge gaps
- Dedicated change management module
- Industry-specific AI opportunity mapping

OUTCOME

Leadership alignment on AI priorities · Clear mandate for org-wide adoption

Enterprise-Wide Upskilling

TRACK 02

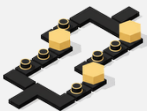

All Functions & All Levels

Lab programs · Bootcamps · Function-specific workshops

- Large-scale training tailored by function and seniority
- From marketing to finance — skills relevant to daily work
- Hands-on labs, bootcamps, and accelerator cohorts
- Function-specific use cases adopted in practice
- Internal AI champions identified within each team

OUTCOME

AI-fluent workforce · Function-specific use cases adopted · Champions identified

Roadmap Advisory

TRACK 03

Strategy, Transformation & Technology Teams

Discovery workshops · Readiness assessments · Roadmap co-creation

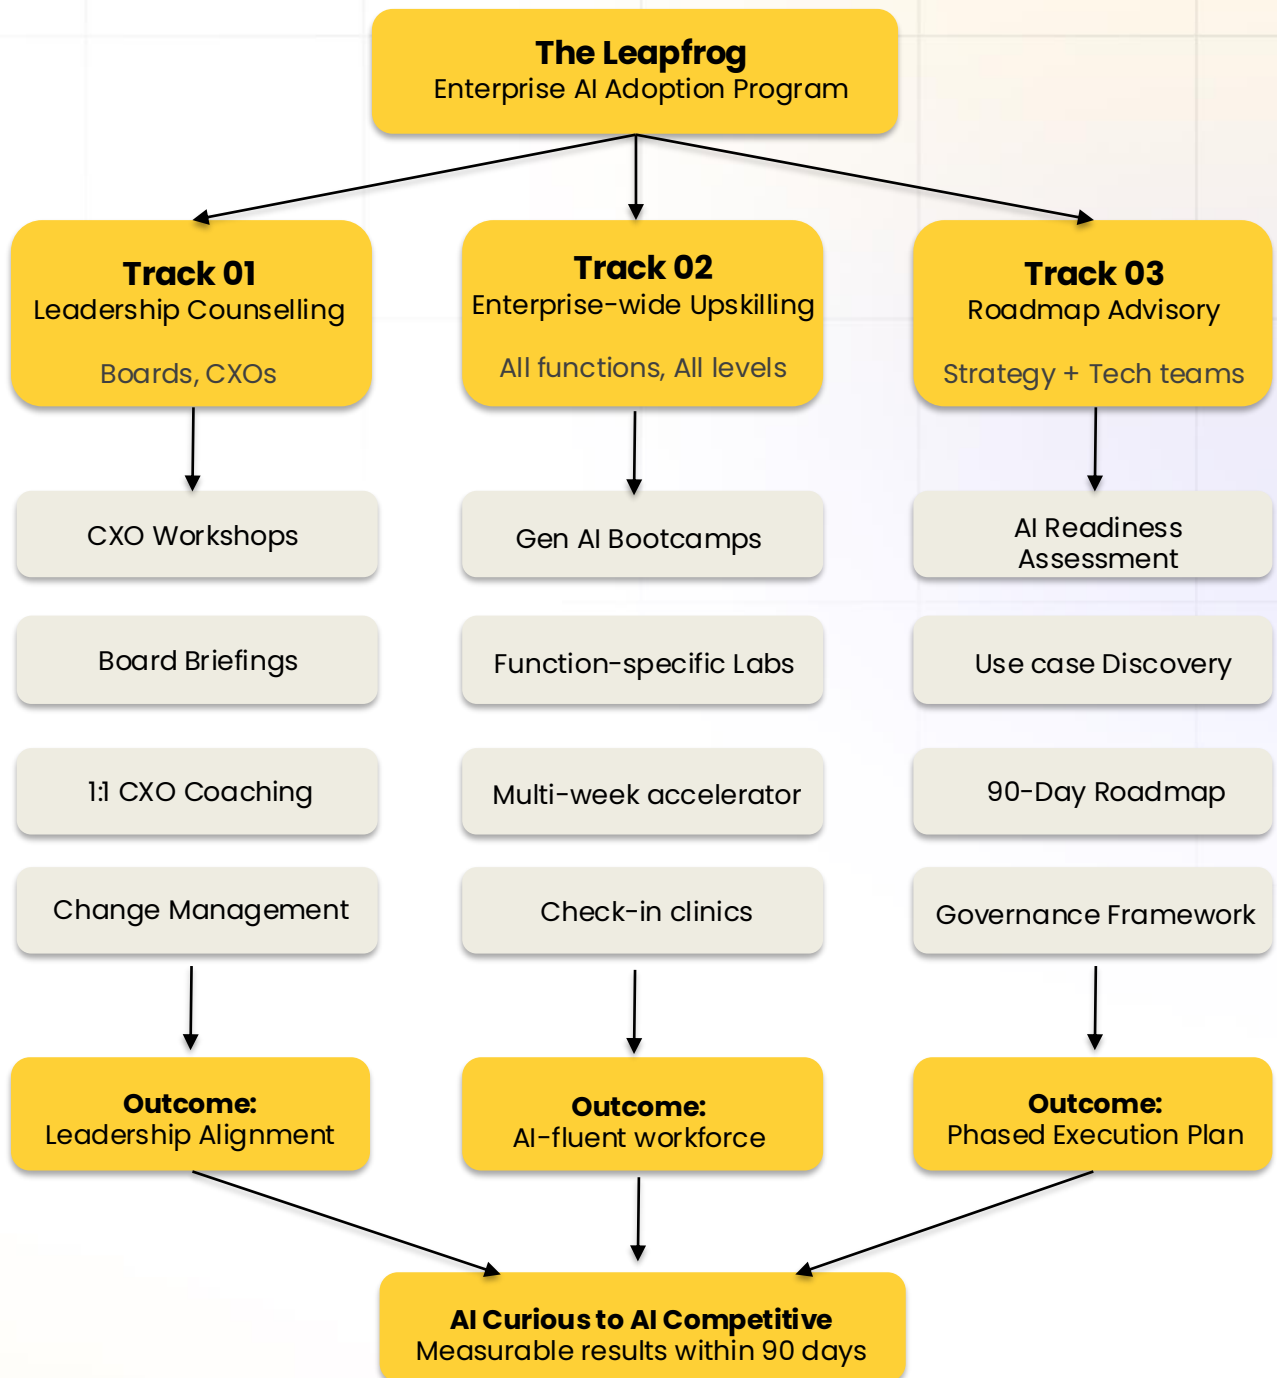

- Assess AI readiness across 5 dimensions
- Identify and prioritize high-impact use cases
- Build a phased 90-day implementation roadmap
- Define success metrics, KPIs, and governance
- Co-creation — your strategy, enabled by our expertise

OUTCOME

Prioritised use-case pipeline · Phased 90-day roadmap · Defined KPIs

PROGRAM STRUCTURE

How the Three Tracks Lead to AI Adoption

Each track operates independently but compounds when combined.

ENGAGEMENT MODELS

Choose Your Entry Point

Leapfrog is not a sequential program. Enterprises enter at the tier that matches their readiness and ambition. Each model is self-contained and delivers clear outcomes.

EXPERIENCE

"Imagine AI in Your Workflow"

Duration: ~1 Month

Teams and leaders who need hands-on exposure before committing to broader adoption

- ✓ Custom Gen AI Bootcamp(s) tailored to your function and industry
- ✓ Check-In Clinics to reinforce learning and troubleshoot early adoption

Outcome: Teams start imagining daily workflows with AI — moving from curiosity to first-hand experience

★ MOST RECOMMENDED

ADOPT

"Re-Imagine Your Workflows"

Duration: ~3 Months

Enterprises ready to move from awareness to real workflow change

- ✓ Custom Gen AI Bootcamp(s) across priority functions
- ✓ CXO AI Alignment Briefing for leadership buy-in
- ✓ Check-In Clinics and ongoing virtual follow-ups
- ✓ Use Case Mapping and prioritization workshops
- ✓ Sampling new AI-powered systems and tools in practice

Outcome: Teams re-imagine workflows, test in practice, and make AI part of how they work

TRANSFORM

"Make AI a Core Operating Capability"

Duration: 6–8 Months

Organisations ready to take the full AI leap across leadership, teams, and strategy

- ✓ All Leadership Counselling modules (CXO workshops, board briefings, 1:1 coaching)
- ✓ Rolling Enterprise-Wide Upskilling across all functions
- ✓ Full Roadmap Advisory — readiness, use case pipeline, 90-day roadmap
- ✓ Change Management embedded across all tracks
- ✓ Ongoing Advisory Retainer with monthly strategic check-ins

Outcome: Leadership aligned · AI-fluent teams · Clear roadmap · Measurable transformation

ENGAGEMENT CATALOGUE

WHY HUMAINE LABS

A Full-Stack Solution for Enterprise AI Adoption

Humaine Labs and DotKonnekt together bring a full-stack solution for enterprise AI adoption — combining hands-on AI practitioners with deep leadership education and strategic advisory.

This is not a training company partnering with consultants. It is a single, integrated ecosystem built to take organizations from AI awareness to AI advantage.

Practitioner-Led

Real AI builders who have deployed live systems — not just theorists.

Outcomes-Driven

Every engagement is anchored to measurable business outcomes.

Integrated Ecosystem

Leadership advisory + workforce upskilling + strategy roadmap, under one roof.

Localized for Asia

Built for the India and Asia-Pacific enterprise context.

INDUSTRY RECOGNITION

Rated among the top AI service companies by Constellation Research — recognised for our practitioner-led, outcomes-driven approach to enterprise AI enablement.
